Jonathan Clark

Software Developer

Highly experienced professional with 12+ years background in Management and customer satisfaction. Proficient in using a wide variety of tools to provide efficient, cost effective solutions to boost productivity and overall organizational efficiency.

Development Projects

Contacts Management CLI
Command Line Interface written solely in Java for the purpose of managing a list of contacts and phone numbers. This Paired Programming project explores concepts of *Menu Driven List Manipulation* as well as using *File I/O* to manage data from sources existing outside of the program. What makes this project especially unique is its ability to validate user input to ensure a smooth, concise user experience.

Weather Map Project
Single page web application that utilizes HTML,CSS,JQuery, and AJAX. This project accesses multiple open-source APIs to provide an in-depth weather forecast. Users can search and update a 5-Day Weather Forecast, in real time, based on either a searched location or a location set via pin-drop on an embedded map.

Mobile Design Project
Single page application that focuses entirely on building a page that is fully responsive across multiple viewports. This web application hones in on complex styling and positioning concepts using Bootstrap, HTML, and CSS.

Professional Experience
